

IBM SCLM Suite Roadshow

SCM in Today's Environment

In the beginning there were OS/390® based applications consisting of “green screen” interfaces to IMS™, COBOL, and DB2® applications. In the 1980's, distributed development was introduced for generating new applications on distributed systems (not yet integrated with the OS/390 development). At the same time, WYSIWYG PC programs were introduced for document generation. Then, in the mid 1990's the Internet came...

Today's e-business application consists of the backend server based application which is substantially the same as it has been for the last 20 years (DB2, COBOL, CICS®, etc.). However, the front end of these applications now consists of a web server providing the interface between the browser and the backend application server. Additionally, documentation describing applications may be stored in Wordpro®, Word, and other PC document management applications. In other words, modern e-business application development requires that the traditional S/390® application, front end web server application, and documentation all be managed and treated as one e-business application. Can your Software Configuration Management solution handle this new environment? Are you required to use multiple tools that do not talk to each other - one set of tools for your z/OS™ development and maintenance and another to manage your web components?

The IBM z/OS SCLM Suite provides a comprehensive and integrated S/390 web based SCM (Software Change and Configuration Management) solution which enables S/390 centralized storage, management, and control of both e-business and S/390 objects. The IBM Merge Tool for z/OS and OS/390 can be used in conjunction with the SCLM Suite to help you more effectively manage your parallel development activities.

Are you currently using Computer Associates' Easytrieve®? How would you like to translate all those Easytrieve reports into standard COBOL? The IBM Migration Utility for z/OS and OS/390 can help. Your users can even continue to write Easytrieve programs if they wish.

Please join us at any one of three venues across the central region of the United States to learn more about the IBM z/OS SCLM Suite and related products such as the IBM Merge Tool and the IBM Migration Utility. Join IBM experts and your peers to collaborate in a lively and informative series of sessions as depicted in the following “Agenda Overview”.

Enrollment Instructions

Send an e-mail to the event coordinators, Susie Sanchez (susies@us.ibm.com) and Marsha O’Brien (mobrien@us.ibm.com). In your e-mail, please include your name, phone, title, affiliation, and the date & location of your venue selection. Private sessions with the IBM executives are available in the afternoon and will be scheduled on a first come, first served basis. Requests for a private meeting should be sent to the event coordinators.

<p style="text-align: center;">August 13 (Tuesday) IBM Detroit Branch Office Room 1505 18000 W. Nine Mile Southfield, MI 48075</p> <p style="text-align: center;">August 14 (Wednesday) IBM Columbus Branch Office Conference Room A 5475 Rings Road Dublin, OH 43017</p> <p style="text-align: center;">August 15 (Thursday) IBM Chicago Branch Office Room 502 330 N. Wabash One IBM Plaza Chicago, IL 60611</p>	<p style="text-align: center;">Agenda Overview:</p> <p style="text-align: center;">08:30 Registration (And Continental Breakfast)</p> <p>09:00 What is the IBM SCLM Suite and how can it help you?</p> <p style="text-align: center;">10:15 Break</p> <p>10:30 See the tools in action</p> <p style="text-align: center;">12:00 Adjourn</p> <p>1:00 - 4:00 Private meetings with IBM product executives</p> <p style="text-align: center;">Questions or Comments: Please call or write Marsha O’Brien 919-524-5651 mobrien@us.ibm.com</p>
---	---

This event is a no-charge event for IBM customers and IBM business partners. Attire is business casual. We look forward to seeing you soon! Thank You
