

IBM Software Onsite Assist Pack (SOAP) and Self-paced Virtual Class (SPVC)

If you are running IBM DB2, Websphere Application Server, Websphere MQ or Websphere Message Broker in your organization, requiring support as well as getting enablement on the product technology, then this is the right offering for you as it is packaged to provide you with just that.

Highlights:

- A single offering that offers both onsite support (24x7) and self paced learning
- Immediate savings off list price

What's More:

Sign up now and enjoy 10% discount off all our public training classes (classes to be attended before 30 Sep 2011)

Why SOAP

SOAP is a 5-day (24 x 7) onsite support package designed to meet the support needs of IBM clients who:

- Run critical systems with high availability requirements
- Require round-the-clock and technical support
- Are going through critical project lifecycles and require onsite assistance

For severity 1 PMR support requests, IBM provides 6 hours onsite response goal to ensure that you get the most immediate attention for critical issues.

Why SPVC

While cost reduction is often a key business justification for implanting an e-learning program, online training offers several advantages, including:

- Elimination of travel costs
- Consistency
- Scalability from a few users to a worldwide deployment
- Flexibility to allow users to learn over a period of time
- Modularity to provide customization options
