

### Readme for APAR IY75655

**Example:** To use 'notifyNewAccount' extension node in add operation workflow of Account Entity to ensure that a notification email is sent to owner, when the operation completes with warnings.

1. Register the 'notifyNewAccount' extension by changing workflowextensions.xml  
Please refer the note for APAR IY75655 in the Interim Fix IF02 Readme for the required steps to register the extension and restart ITIM.
2. Navigate to Account Add operation workflow.
3. Add an extension node and name it 'notifyNewAccount' and connect it to the other nodes as shown in figure below.

4. In the extension node properties enter the following information -
- ActivityID** - Name of the node
- Extension Name**- Select '**notifyNewAccount**' from the drop down list.
- Relevant data:**
- Owner:** The entity representing the owner of new account.
- Service:** The entity representing the service of the new account.
- Account:** The entity representing the new account.

**Properties: Extension Node**

General | Postscript

\* Activity ID: notifyNewAcct
