

# WHAT IF...

you could get more speed and save money using a runtime that developers like and is easier for you to manage?

Did you know that WebSphere Application Server performs better than open source application servers and is more cost effective?

## FAST

**29%**

faster runtime performance than JBoss EAP v6 with WAS v8.5.5<sup>1</sup>

## POWERFUL

**32%**

faster runtime performance than Tomcat EE 1.7.1 with WAS v8.5.5<sup>2</sup>

## AFFORDABLE

**44%**

better ROI compared to open source application Servers<sup>3</sup>

Designed for developers, by developers, WASLiberty has a componentized architecture that is lightweight and easy to deploy helping developers easily build and compose with micro-services on the same technology footprint of your other applications.
