Broadcast date: August 29, 2013,
11:00 a.m. EDT / 3:00 p.m. GMT / UTC

Developed for: IT and enterprise architects;
IT managers; system programmers; system analysts;
and, operations managers

Technical level: Intermediate

As new workloads move onto System z®, is productivity keeping up? Can you monitor and manage the mainframe supporting mobile, cloud and big data environments?

Webcast

Join us for a complimentary webcast as we look at new features and functionality in the Tivoli® OMEGAMON® family to support increased demands around mobile, cloud and big data. In addition, we will discuss IBM's continued focus on integrating Service Management capabilities for improved productivity and availability across the enterprise. This webcast will cover recently announced OMEGAMON capabilities across z/OS®, Mainframe Networks, storage and z/VM®.

You will learn how OMEGAMON can exploit new IBM zEnterprise® capabilities to proactively resolve problems before they become outages, and how IBM is enhancing the System z Service Management portfolio to support new business and IT visibility requirements for mobile, cloud and big data.
