

Enhanced OMEGAMON V5.1 installation and configuration saves time and money

Teleconference – February 21, 2013

Highlights

Topics

- Simplified configuration so you can quickly implement and deploy products to monitoring environments
- Greatly reduced number of choices you need to make up-front, and you can easily introduce changes later
- Upgrade or maintain products without reconfiguration, minimizing the time required for these tasks

Speaker: *Cecile Day*, Tivoli Monitoring z/OS® Installation and Configuration Developer, IBM Software Group

Broadcast date: February 21, 2013,
11:00 a.m. EST / 4:00 p.m. BST / 3:00 p.m. UTC

Developed for: IT and enterprise architects;
IT managers; system programmers; system analysts;
and, operations managers

Technical level: Intermediate

- Do you dread mainframe software maintenance?
- Is your maintenance window shrinking?
- Are you under pressure to install fixes more quickly?

Software maintenance can be painful and time-consuming. And when maintenance jobs fail due to incorrect information, it can cause additional outages. Decreasing the number of steps and using predefined parameters lowers the risk of maintenance jobs not completing successfully.

Teleconference

Join us for this complimentary teleconference and learn about the enhanced capabilities of IBM® Tivoli® OMEGAMON® for an improved maintenance experience with simplified installation and configuration. With significantly enhanced usability and improved productivity and availability for IT operations, you'll come away with a good understanding of how the latest enhancements to OMEGAMON configuration tooling can save you time and resources.
