

Improve availability and productivity with proactive automation

Gain new zEnterprise insights integrating OMEGAMON and System Automation for z/OS

Webcast – July 18, 2013

Highlights

Topics

- Declining staff resources, skills, budgets and time to manage zEnterprise
- Responding to problems quickly before they become outages
- Increasing automation across the enterprise
- Addressing user performance problems before operations is aware of them
- Increasing workloads and decreasing the time required to manage them

Speaker

- *Uwe Gramm*, Senior Product Manager, IBM System Automation for z/OS, IBM Software Group

Broadcast date: July 18, 2013,
11:00 a.m. EDT / 3:00 p.m. GMT / UTC

Developed for: IT and enterprise; IT managers; application programmers and managers; system analysts; operations managers; system administrators

Technical level: Intermediate

Are you exploiting automation to the fullest extent in your enterprise? Do your monitoring and automation tools work well together? Monitoring IT resources alone does not provide a complete view of application performance, and it makes problem isolation and resolution a complex, expensive task

Webcast

Join us for a complimentary webcast as we discuss how using Tivoli® OMEGAMON XE to improve zEnterprise® monitoring – interfaced with System Automation for z/OS® – can increase availability as well as decrease unnecessary operations workload. Proactive automation enables correlation of problems across applications and drives automated problem resolution without manual overhead.

Monitoring and automation working together can minimize the time it takes to find and fix problems. This webcast will give examples of zEnterprise situations where having OMEGAMON® and System Automation working together can proactively resolve problems. Come hear how these two products together can save you time and make it easier to achieve SLAs.
