

IBM DB2 10 migration planning and customer experiences – Part 1 & Part 2

Webcast – March 12-13, 2013

Highlights

Topics

- Reviewing hardware and software requirements
- Premigration tasks to prepare your subsystem
- Determining which new features and functions you need
- Providing an SMS environment for managing DB2 catalog and directory data sets

Speaker

- *John Campbell*, IBM Distinguished Engineer, DB2 for z/OS® Development, IBM Software Group

Broadcast date: March 12 and 13, 2013,
11:00 a.m. EDT / 3:00 p.m. GMT / UTC

Developed for: IT and enterprise architects; IT managers; database administrators and managers

Technical level: Intermediate

IBM® DB2® 10 has been in widespread use for some time, and many IBM customers have started their upgrades to it, or are planning upgrades this year, since the announcement of the DB2 11 Early Support Program. The initial response to DB2 10 has been extremely positive and many customers have realized cost savings right out of the box, along with the expected CPU savings. However, it is essential to follow IBM best practices for DB2 to reap these benefits.

Webcast

Join us for this complimentary two-part webcast as we share tips to help facilitate your migration, with planning information about migrating to DB2 10 for z/OS from either DB2 9 or DB2 Version 8. You'll learn some surprising facts, pitfalls to avoid and lessons learned from those who have migrated before you, such as enabling fast start. We will also discuss DB2 10 enhancements. This webcast is a unique opportunity to get valuable advice from one of IBM's most esteemed DB2 subject matter experts.

All attendees will receive a complimentary copy of the new DB2 10 Migration Planning whitepaper, written by John Campbell.
