Modernizing your DB2 environment with DB2 Utilities and Tools for z/OS

Teleconference – March 26, 2013

Highlights

Topics
- Minimizing downtime associated with routine DB2 data maintenance
- Reducing CPU and elapsed time and increase zIIP-eligible workloads
- Streamlining and automating routine DB2 utility maintenance
- Creating company-wide DB2 Utility standards, which can also be used for auditing

Speaker: *Hendrik (Hennie) Mynhardt,*
Executive IT Specialist, DB2 for z/OS, zChampion

Broadcast date: March 26, 2013,
11 a.m. EDT / 3:00 p.m. GMT / UTC

Developed for: Application programmers and managers; database administrators and database managers

Technical level: Intermediate

The IBM® DB2® Utilities Suite is a cornerstone of managing the DB2 for z/OS® environment. Are you taking full advantage of it with best practice techniques that can save you time and money? Are you aware of the latest performance enhancements that have been delivered in the maintenance stream?

Teleconference

Join us for this complimentary teleconference and get answers to these questions and more, including how the integration of DB2 Utilities and Tools benefits you. In addition to DB2 Utilities and Tools, we'll discuss other options that can help you modernize your DB2 for z/OS environment. Staying current on the latest enhancements can reduce overall operating costs and improve performance. Whether it's loading a table, copying a table space, or recovering a database to some previous point in time, DB2 Utilities can relieve the burden of maintaining DB2 data. Learn more about the value you may be missing.
