

Modernize and standardize the administration of IMS: Do you have a plan for the future?

Teleconference – May 7, 2013

Highlights

Topics

- Create and update IMS resources more frequently and reliably, and manage IMS parameters
- Simplify change management systems and processes
- Make IMS management and configuration more accessible to new system programmers and developers
- Achieve faster time-to-production for new IMS applications
- Gain the benefits of DRD and retain the security, change control, and audibility standards already developed

Speakers:

Margaret Wilson, IMS Tools Market Manager,
IBM Software Group

Jim Martin, US Representative, Fundi Software

Broadcast date: May 7, 2013,
11:00 a.m. EDT / 3:00 p.m. GMT / UTC

Developed for: Database administrators and managers;
system programmers; operations managers

Technical level: Intermediate

The latest releases of IMS™ introduced significant enhancements that simplify the administration and management of IMS. These include IMS Dynamic Resource Definition (DRD), which allows resources to be added dynamically, without requiring a SYSGEN; a rich set of administrative commands for online management; and, a repository that centrally stores resource definitions for better IMSplex management.

Most IMS customers have existing processes and automation that are impacted by these changes. Often, these processes are held together with in-house applications that have run unchanged for years. This can create a difficult choice: Forego the advantages presented by the improvements to IMS, or invest heavily in custom applications?

Teleconference

Join us for a complimentary teleconference as we discuss how IMS Configuration Manager can help you capitalize on the enhancements to IMS, while standardizing your technical tools and retaining the underlying business processes. Even with IMS resources that are increasingly complex, geographically dispersed and required on-demand, you'll learn how you can have visibility into, and centralized control over, your entire IMS topology.
