New Functionalities

Pacbench Client/Server 2.0

Miscellaneous

OCX: the conversion of the communication area according to the page code has been optimized *(C 16763)*

OCX: the conversion of the communication area according to the page code has been optimized. It is no longer based on the maximum size of the message but on the maximum size of the Logical View.

OCX: recognition of numeric fields which include a great number of digits *(C 16764)*

Recognition of numeric fields which include a great number of digits in Logical Views and User Buffers.

Corrected Bugs

VA Pacbase WorkStation

Miscellaneous

EMPAC: Recognizing the Host context *(C 16731)*

WorkStation Emulator: after a transmission, the Host context displayed on top of the screen at the right side is recognized again.

Pacbench Client/Server 2.0

Proxy functionalities

OCX : Synchronization of rowsCheckPresence attribute with DataDescription and detailCheckPresence instances for local updates *(C 16762)*

Each time detailChecKPresence attribute is locally updated, the updated instance affects rowsCheckPresence.
