New Functionalities

VA Pacbase WorkStation 2.0

Compatibility

OMT PGM and SVR entities *(C 16612)*

In the Pacbench module, a new description "Triggers Business Components" has been added to the descriptions of the Program entity.

The corresponding cross-reference "Triggered by Programs" has been added to the cross-references of the SVR entity.

Caution: these changes require the reloading of both the OMT methodology transactions using the UPDT procedure and the AE transcodification file using the PARM procedure.

OMT Method

OMT PGM and SVR entities *(C 16612)*

In the Pacbench module, a new description "Triggers Business Components" has been added to the descriptions of the Program entity.

The corresponding cross-reference "Triggered by Programs" has been added to the cross-references of the SVR entity.

Caution: these changes require the reloading of both the OMT methodology transactions using the UPDT procedure and the AE transcodification file using the PARM procedure.

Corrected Bugs

VA Pacbase WorkStation 2.0

Miscellaneous

EMPAC: random crashing when the screen is being printed *(C 16525)*

"Emulation" application of the WorkStation: it no longer crashes when the printing of the screen is requested.
