## "eLabs Edge" exclusively for you at eLearning-Labs (eLL)

Each student gets their very own virtual workstation - accessed via a current browser from anywhere on the Internet. Just like any face-to-face classroom, our **eLabs** include over-the-shoulder mentoring - with the click of a button!

- IBM-authorized courseware
- Live IBM-certified instructors
- Properly configured, powered, connected
- No client installations - one browser plug-in
- No downloads
- Voice Over the Internet (VOIP)
- Ask questions - live voice
- Labs and implementation eWorkshops
- IBM workbooks
- iSeries deployment to access legacy db
- Personal live VOIP mentoring

All the benefits of traditional classroom education – and more – without the high costs. No business travel, no time out of territory (No Toot).

Industry experts say top instructors teaching live over the Internet speeds the learning process up over 80%

The quality of learning this way is superior to what you typically receive from an eBook, CD or audio tape.

Live Internet lectures from other sources can help you, but not the way our **eLabs** pay off.

Get the best ROI possible from **eLearning-Labs**!

Some comments from eLearning-Labs students...

"I was so impressed with the overall course that **I would recommend it to any iSeries person**, and I will. The concept is incredible. This is the way school should be taught."

Ray Kittelstad - Avitar

"Loved the class - the brochure is right, this is the way the class should be done. And **I appreciate your attempt to have different classes for different roles (developer/administrator, etc.)** I am anxious for more intensive WebSphere training."

Holly Gleason - Corning Data Services, Inc

"Last week DKNY… attended your SW275 WebFacing course. I was skeptical as to the quality and educational value of a course delivered over the Internet … **it was a pleasant surprise** … you have a winner in **eLearning-Labs** and a new customer."

Ron Slawinski – Senior Director Logistic Systems – Donna Karan Intl.

The IBM® SMB Enterprise Transformation on iSeries™ Campaign: Improving the User Interface

Featuring your On-demand **eLearning-Labs** Education System with the *"eLabs Edge"*

- ECIS IBM-authorized WebSphere™ courseware
- IBM-certified Instructors
- **eLL** On-demand IBM Education
- **eLL** Implementation eWorkshops

It's CRITICAL to transform iSeries greenscreen applications into eBusiness apps – IBM is committed to do it with the WebSphere Development Studio tools:
- **WebFacing** ■ **HATS**

You're about to discover a collaborative, high-impact, worldwide IBM program between:
- **iSeries** ■ **WebSphere brand** ■ **ECIS**
  ■ **eLearning-Labs**

eLearning-Labs

"Save Time and Money" at eLearning-Labs

The value of learning this way is provided by high quality IBM courseware, skills of specially trained IBM-certified instructors and the quantified comparison for taking courses face-to-face in traditional classroom education.

Our specially trained instructors are actual developers with field experience and IBM-certified on IBM authorized courseware.

eLL instructors and mentors are actual developers who work every day using IBM technologies. This insures that every **eLL** customer receives immediate answers to their questions during lectures and lab exercises.

Most importantly – to insure that this unique training environment is effective – our instructors and mentors are trained in the use of Lotus LearningSpace, to provide the best possible learning experience and immediate feedback.

Our secure password protected environment includes individual workbooks delivered in an IBM student kit when our customers register using our automated administration services – plus a certificate of completion to demonstrate competency.
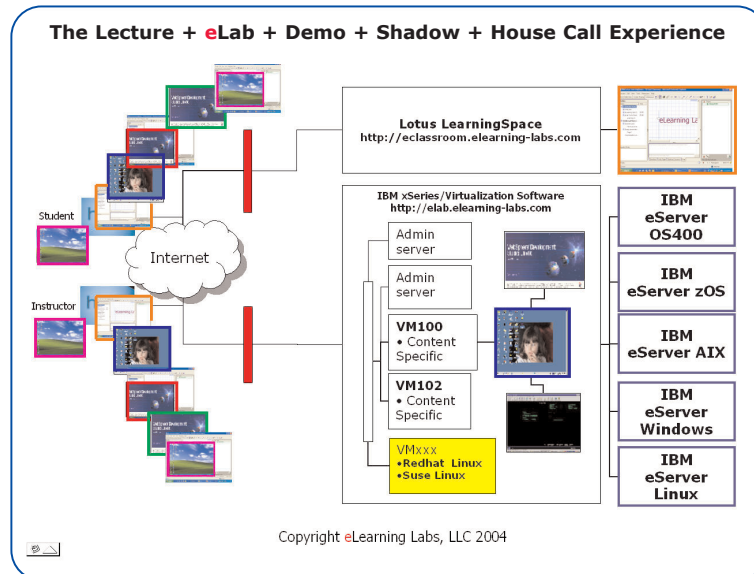

Best of all, our online **eLabs** are simply accessed via a current browser – no need for a development system or the required software and configurations. Simply connect and go – on DSL, cable modem or anything faster for best results!

Example:

eLearning-Labs Training		Traditional Classroom Training
Web-Enabling 5250 Applications using the IBM WebFacing Tool	**vs.**	**Web-Enabling 5250 Applications using the IBM WebFacing Tool**
IBM Course SW275 lectures and labs		IBM Course SW275 lectures and labs
		$1,800 per student course price
		+ $1,200 average travel & living expenses
		+ $4,000 lost productivity out of office
@ $1,575 per student		**@ $7,000 per student**

Your best possible ROI for iSeries WebSphere Development Studio/HATS training on IBM Courseware

- Virtual Classrooms - enjoy live, instructor-led synchronous sessions … get materials via browser - use your PC as a "white board" … voice your Q&A with instructors on the spot.

- Labs - develop prototype applications … discover tips and techniques … utilize live lab environment with over-the-shoulder mentoring for immediate feedback from instructors.

- iSeries deployment - includes labs exercises deployment on **eLL's** iSeries backend legacy and database.

- iSeries WebSphere Application Server eWorkshop mentoring – available on a scheduled basis for the Express version for iSeries.
