WebSphere® software

IBM

Get Started with Business Process Management Training from IBM® WebSphere® Education

- WebSphere Education's BPM curriculum supports all phases of the BPM life cycle, from modeling through assembly to deployment and monitoring

- Comprehensive BPM and WebSphere product curriculum supports many roles in today's business organizations, from business analysts to integration developers and system administrators

- Flexible training options include an instructor-led online format that lets the classroom come to you

Market conditions can change at breakneck speed. Unpredictable market forces – such as mergers, acquisitions, regulatory requirements and continued globalization – can inhibit the ability of your company to grow and compete. To meet these and other unforeseen business challenges, your organization must streamline, monitor and control business processes and integrate your company's people, processes and information for improved agility and responsiveness to a rapidly changing business environment.

Business process management (BPM) enabled by service-oriented architecture (SOA) is the key to meeting these challenges. Support of BPM in WebSphere software follows a holistic approach, including products and training across the BPM life cycle – from modeling through development (the assemble phase), deployment (the run phase) and monitoring of business processes (the management phase).

Comprehensive and holistic BPM curriculum
Key products, such as IBM WebSphere Business Modeler, WebSphere Business Monitor, WebSphere Process Server and WebSphere Integration Developer can help your organization leverage the BPM tools and skills that underlie a business's capability to respond to unexpected challenges in the marketplace. The BPM-oriented WebSphere curriculum mirrors IBM's holistic approach to BPM with a deep set of courses across the WebSphere productline and the IT and business roles that enable BPM.

An ideal starting point for your BPM training is WebSphere Education course *WB170 / VB170: Using IBM WebSphere Business Modeler, Monitor and Process Server for BPM*. This course provides an overview of both BPM and the WebSphere products that enable BPM and is appropriate for key business and technical users who are involved in your company's BPM efforts.

IBM WebSphere Business Modeler

This curriculum helps the business analyst build skills to define, simulate, and design key performance indicators for a process solution. There are three core courses which were recently updated with new content, including key content for WebSphere Business Modeler Publishing Server. Successful completion of these classes prepares you to earn the IBM Certified Business Process Analyst-WebSphere Business Modeler Advanced designation. Some of the courses available for IBM WebSphere Business Modeler include:

- *WB182 / VB182: IBM WebSphere Business Modeler: Process Mapping, Simulation and Analysis*
- *WB184 / VB184: IBM WebSphere Business Modeler: Process Mapping and Analysis*
- *WB186 /VB186: IBM WebSphere Business Modeler: Process Simulation and Analysis*

IBM WebSphere Process Server and WebSphere Integration Developer

At the heart of a BPM-oriented WebSphere solution is WebSphere Process Server and the accompanying development tool, WebSphere Integration Developer. With courses for system administrators and application and integration developers, you will learn how to leverage these products in tandem to build and deploy process integration solutions. You can further specialize your skills with courses in business process choreography and human task management. Some of the courses for IBM WebSphere Process Server and WebSphere Integration Developer include:

- *WB111 / VB111: Integrating Using IBM WebSphere Integration Developer and Process Server*
- *WB112 / VB112: Integration Using IBM WebSphere Integration Developer and Process Server II*
- *WB121 /VB121: Administration of IBM WebSphere Process Server V6.0.2*

IBM WebSphere Business Monitor

This flexible curriculum provides courses for integration developers who need implementation skills for WebSphere Business Monitor and also provides a more introductory overview of business activity monitoring for business analysts. Successful completion of this WebSphere Education curriculum will prepare you for the IBM Certified Solution Designer — WebSphere Business Monitor

designation. Courses available for IBM WebSphere Business Monitor include:

- *WB190 / VB190: Implementing IBM WebSphere Business Monitor*
- *WB191 / VB191: Implementing IBM WebSphere Business Monitor with Process Server Overview*

IBM WebSphere Business Services Fabric

IBM WebSphere Business Services Fabric is a comprehensive SOA offering that is designed to extend IBM's platform to deliver flexible composite business applications. The WebSphere Education curriculum for WebSphere Business Services Fabric teaches you about composite business services and their value in addition to the WebSphere Business Services Fabric API. The curriculum also covers how to leverage WebSphere Business Services Fabric with other products in the IBM Business Process Management portfolio, including WebSphere Process Server and WebSphere Integration Developer to extend BPM with SOA. The curriculum for IBM WebSphere Business Services Fabric includes the following:

- *WU201: WebSphere Business Services Fabric*
- *WU030: Banking Payments Pack - SOA Accelerator for Financial Institutions*
- *WU031: Telecom Operations Pack - SOA Accelerator for Telecom Service Providers*

Flexible training options

The comprehensive curriculum available for BPM for WebSphere is enhanced by the availability of flexible learning options. Many courses in the BPM curriculum are also available in an instructor-led online (ILO) format, which provides the same content, instruction and labs as the classroom version – all without the need to travel. Other online learning options include self-paced online training, which allows you to access the same content as the live instructor-led classroom course, but at your own speed.
