

IBM Scholars Program

Helping cultivate the next generation
e-business leader

The IBM Scholars Program provides higher education institutions with a wealth of academic and research resources from IBM. The IBM Scholars Program makes it easier for faculty and researchers to access IBM software, hardware, technologies, educational resources and other information--all under one program.

This complimentary program provides you with convenient access to a comprehensive IBM software and middleware portfolio, servers and hubs, tutorials and other educational material, and technical support. Designed to help educational institutions keep current on emerging technology, the IBM Scholars Program offers an unparalleled degree of flexibility and breadth of benefits.

The IBM Scholars Program includes:

- e-business software and technologies, such as WebSphere, DB2, Lotus and AIX
- Discounted offerings for IBM eServers, including iSeries, pSeries and zSeries
- Access to servers such as a Linux hub for research projects
- Educational materials, curriculum and case studies
- Certifications in e-business products and solutions
- Attendance at IBM Learning Services courses at no charge
- And much more!
