Enable System z for SOA
### AN EXPLORATION OF TECHNOLOGY

When: *April 28th 2009 11AM-3PM*
Where: *IBM Briefing Center 3059 E. Cornwallis Drive, RTP NC 27709*

Join us for this complimentary half-day technical seminar as we explore the innovations provided by IBM iLOG and the WebSphere Business Process Management suite of software. Through presentations and demonstrations, we will explore a variety of topics that serve to illustrate how IBM can provide solutions for externalizing business logic in legacy applications throughout your enterprise. You will come away with a good understanding of how this technology can help you reduce development costs and enable a dynamic business infrastructure.

Topics addressed in this half-day session include:
✓ How to protect your system z investments
✓ Optimize use of your existing assets
✓ Create flexible business driven integration
✓ Reduce IT expense through reusable services
✓ Increase alignment between business and IT

No previous iLOG or WebSphere knowledge necessary.

Agenda:
▪ Demonstrate how iLOG technology can externalize program logic for dynamic business flexibility
▪ Demonstrate how IBM has the most powerful, complete and standards-compliant tools in the industry
▪ Show how to use the tools to define and implement a flexible software stack
▪ Summary
▪ Next Steps / Q&A
Lunch provided

Registration: Frances Williams frwilli@us.ibm.com
