

Portal-to-Go

All you need in one Big Blue Box

Portal-to-Go

All you need in one Big Blue box

OK. You get it. You've read all the reports, all the ROI analyses, and you're convinced that a corporate portal will not only help your company save money but speed-up and improve communications. Now, you're faced with the challenge of choosing the right portal vendor. Faced with dozens of companies offering seemingly similar products, where do you begin? That's where we come in. Delivering a joint solution unmatched in the industry, IBM® and Interwoven® have teamed-up to provide a proven, end-to-end portal solution that includes software, hardware, services and financing--in fact everything you need--in one Big Blue box.

IBM WebSphere® Portal Extend

You're familiar with the mantra, "Get the right information to the right people at the right time." But in the real world, capitalizing on your digital and human assets is often easier said than done. With your first-class portal site up-and-running, you can solve this problem by providing simplified access to information, applications, and people, bringing together all of your assets in one place.

Interwoven TeamPortal™ for IBM WebSphere Portal Family

The facts are simple. In order for your WebSphere Portal to succeed, the content that feeds it must be reliable. Too often, portal content is irrelevant or outdated because it is locked away in repository stores. To ensure the accuracy and relevance of your content, you must be able to empower your portal users to collaborate on and interact with their content before publishing. The challenge is compounded if you have thousands of employees and multiple content repositories to manage. Enter Interwoven TeamPortal. Interwoven TeamPortal is the industry-leading content platform that offers unmatched collaborative functionality. With Interwoven at your side, you're sure to realize your portal's full potential and achieve a speedy return on your portal investment.

IBM @server

Now that you have two industry-leading, tightly-integrated applications to create your portal, all you need is a hardware platform to support it. Look no further. IBM xSeries™ offers unparalleled price performance, reliability, availability, and serviceability. With IBM xSeries, you can manage dynamic, unpredictable growth as well as the risks and costs associated with your WebSphere Portal initiatives.

IBM Global Services

The people of IBM Global Services bring exceptional experience and resources to WebSphere Portal initiatives. As portal experts, they help you build high-value portal environments that provide fast access to multiple sources of information and knowledge. They enable you to offer a higher degree of personalization and relevance to your portal users than you thought possible. And, by taking advantage of their proven skills and expertise, you can focus on what matters most -- the success of your core business.

IBM Global Financing

In today's volatile economy, budget constraints and lack of capital can seem overwhelming as you attempt to meet emerging market and competitive challenges. With the assistance of IBM Global Financing, you can benefit from reduced costs, simplified budgeting, credit preservation and flexibility. IBM Global Financing offers competitive, flexible financing solutions for acquiring the hardware, software, and services you need to get your portal up-and-running quickly.
