

Next Steps – How to Begin Maximizing the Value of Your Mainframe

Ray Jones

WW Vice President, z Software

Agenda

- **Quantifying Total Cost of Ownership**
- **Implementing SOA and Information on Demand**
- **Detailed Application Design**
- **Optimizing Performance**
- **Delivering High Availability**
- **Software Asset Management**
- **Modernizing the Software Stack**
- **Skills**
- **Porting ISV Applications**

Scorpion Studies

Contact : Marlin Maddy

mmaddy@us.ibm.com

877-598-9675

Who we are ?

- ▶ Part of Systems and Technology Group
- ▶ Platform independent consultants (x, p, i, z and storage)
- ▶ Mission: Displace Competition and Drive IBM Revenue

What is it ?

- ▶ **Business Case Comparison of Customer's current and future costs compared with cost of running on IBM servers and storage.**
 - Combines IT cost analysis and technical architecture
 - Server and storage consolidation, simplification, optimization

Why customers and account teams use our services?

- ▶ Experience: 7 years, hundreds of customers
- ▶ Credibility: Use real customer data
- ▶ Influenced over \$500M of eServer and storage opportunities
- ▶ 75% of customers who have a Scorpion study have increased their IBM purchases

	Zodiac Study (Server)	Scorpion Study (Server)	Storage / ILM Study
Timeframe	~4-8 weeks	~6-10 weeks	~3-6 weeks
Scope	~300 servers Server Consolidation	500 -1000+ servers Cross platform Customized, Complex	Storage Consolidation Information Life Cycle Management
Cost	\$40k - \$50k+ plus travel	\$75k - \$100k+ plus travel	\$30k - \$50k+ plus travel
Notes	Tightly scoped SCON only	platform justification, cross platform Larger studies available	May be stand alone or as an add-on to a server study

Total Cost of Ownership (TCO) Analysis Offering

- Offered by Software Group zProject Office
- One week study focusing on TCO:
 - ▶ Mainframe to distributed offloads
 - ▶ Distributed to mainframe consolidation
- Study will produce a presentation showing:
 - ▶ Alternative configurations
 - ▶ TCO analysis of configurations
- Local SWITA and account team participation required
- Cost: US\$10,000 plus travel expenses
- Contact: csbender@us.ibm.com

WinterGreen Research ROI/TCO

Features and Benefits Analysis -- Calculate Value In the Context of Improved Return on Investment

**Business Models Provide ROI Cost Analysis :
 SLA, EAI, Security, Scalability, Hardware,
 Software, Labor, Networking, Infrastructure,
 Power, Floor Space, Training, Stack Integration**

Summary Page:
SLA

On Line Models Specific to Benefits
Comprehensive, personalized analysis
Analysis of one to many applications
Report to Management

Cost:
\$1,500 per Executive Report
\$5,000 per Presentation
\$16,000 per New Model Set

System z Center of Excellence - zCoE

Getting Started with Service Oriented Architecture

<http://www.ibm.com/developerworks/websphere/services>

System z Infrastructure Architecture Workshop (zIAW)

... a sales opportunity identification tool that ties System z platform capabilities and value to specific client business initiatives.

- zIAWs:
 - ▶ Are 1-2 day workshops aimed at client business and technical leaders
 - ▶ Use established facilitation methodologies, based on proven results
 - ▶ Are a combination of white boarding, presentations, and collaborative “JAD” sessions
 - ▶ Focuses on maximizing value of System z as a platform
 - ▶ Promotes client dialogue and brainstorming
- The objective of a zIAW is to:
 - ▶ Identify existing client business challenges
 - ▶ Identify short and long term business requirements
 - ▶ Identify and document the current (AS-IS) environment
 - ▶ Discuss industry standards and emerging technologies
 - ▶ Develop a proposed future state (TO-BE) architecture,
 - Demonstrate the unique capabilities of a System z solution to achieve competitive advantage
 - Recommend enhancements to the existing architecture – via a “Bill of Materials” (i.e. System z SW/HW product list)

Major areas of focus

zIAWs position the entire cross brand System z software and hardware capabilities to satisfy client business initiatives.

- ▶ Two main areas of focus are:
 - Services Oriented Architecture
 - How to leverage existing assets in an SOA enterprise
 - Value proposition of deploying critical SOA infrastructure on System z (i.e. New Workload)
 - Information as a Service
 - Manage information complexity
 - Lower cost through optimization
 - Manage risk and streamline compliance
 - Leverage information for business transformation

GEO Leaders/Contacts:	Americas	Robert Liburdi/Endicott/IBM
	AP	John Eagles/Australia/IBM
	NE IOT	Gerry McFadden/UK/IBM
	SW IOT	Guilhem Vieljeuf/France/IBM

Worldwide zIAW Website: <http://techworks.dfw.ibm.com/systemz/ziaw.nsf>

Enterprise Application Modernization for System z

Enterprise Modernization & SOA Workshop

What: Use the IBM SDP products, EGL and JSF to build an SOA-based application from scratch. The workshop participants will learn:

- What is EGL
- How to build cross-platform applications
- How to debug prior to code generation
- How to generate Java and COBOL
- How to deploy to WAS/z, CICS

Duration: 1 day

Who: This workshop is for Business Developers who have programming experience in some 3GL or 4GL such as COBOL or Natural.

What you get: Initial training and experience rapidly building a SOA application using EGL

Cost: Free for the **first 10 registrants**; \$2500 thereafter

For more information: Contact Linda Cole at lcole@ca.ibm.com

Application Transformation Assessment Workshop

What: An evaluation of your readiness for an Application Transformation from Natural/ADABAS to EGL/DB2. The assessment includes:

- Sample data source analysis
- Sample source code analysis
- IT skills assessment

Duration: 2 days

Who: IT Staff - Project Managers, Architects, Analysts, Database Administrators, Lead Developers

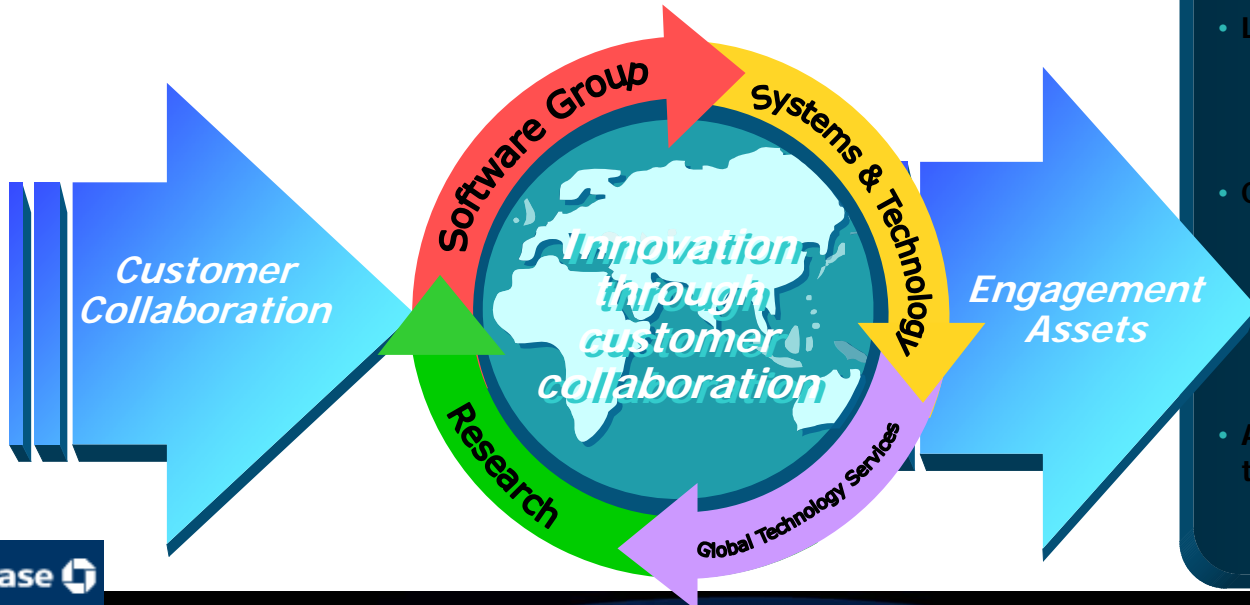

What you get: a high-level Enterprise Application Transformation recommendation & implementation document

Cost: Free for the **first 3 registrants**; \$5000 thereafter

For more information: Contact Ed Gondek at egondek@us.ibm.com

High Performance On Demand Solutions Mission

- Leaders in best practices
 - Whitepapers & patents
 - Templates & patterns
- Create strategic assets
 - SOA Workloads
 - Service Management
 - Software as a Service
 - Performance & Scalability
- Accelerate emerging technologies
 - Web2.0 for collaborative social networking

- Sprint
- bharti
- at&t
- eBay
- Google
- UFIDA
- JPMorganChase
- VISA
- 中國人民銀行 THE PEOPLE'S BANK OF CHINA
- Land Transport Authority
- Ford
- Whirlpool
- GAP

IBM System Centers

Customer Benchmark Center

Our mission is to provide Client requested benchmark capabilities WW for IBM Systems and Storage. Locations in Poughkeepsie, Rochester, Gaithersburg,,Montpellier, Boeblingen, Beijing, Dallas,Tokyo, Seoul, Sydney, Bangalore, And Singapore

High Availability Center Of Competency

Our mission is to work with Customers to help achieve the Availability and resiliency goals of their end-to-end IT infrastructure. Locations in Poughkeepsie and Montpellier

Design Center for On Demand Business

Our mission is to design innovative, integrated Solutions for select worldwide clients that leverage leading-edge technologies and speed their deployment into existing infrastructure to address business problems
Locations in Poughkeepsie, Montpellier, and Makuhari

Deep Computing Capacity on Demand

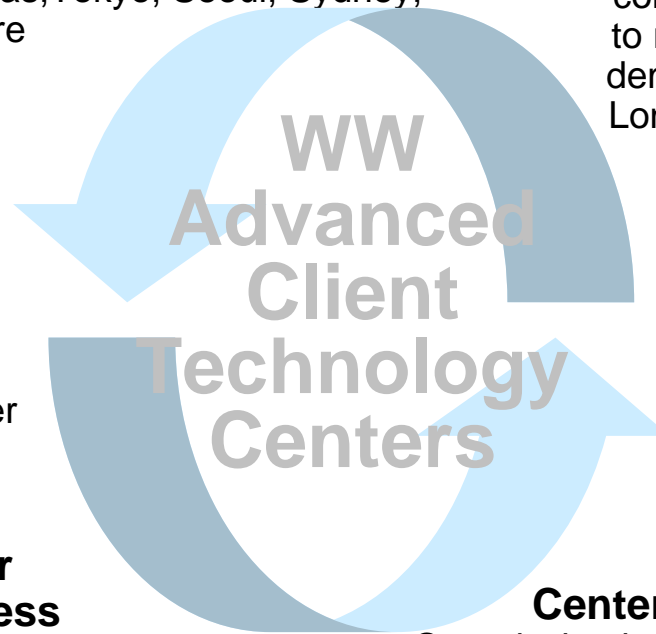

Our mission is to provide off-site utility computing resources to enable our clients to respond quickly to changing IT demands. Locations in Poughkeepsie, London, and Rochester

Benchmark Requirements

Lead in creating plans for industry benchmarks and assist in the communication of results.

Center for Solution Integration

Our mission is to design, develop and test solutions, implement proof of concepts, and provide the necessary assets in support of IBM Solutions.
Located in Poughkeepsie

For more info or making contact with any Center visit: www.ibm.com/systems/services/

World Wide Storage Solution Centers

Montpellier / Gaithersburg / Mainz / Makuhari

- Business Continuity and High Availability Solutions
 - Advise clients on the optimum design
 - Considering Recovery Time and Point Objective
 - Perform a “Proof of Concept” of the proposed solution
 - Capabilities Include:
 - End to End Solution Testing Including Distance Simulation
 - Complimentary Partners: Cisco, McData, Adva, Ciena
 - Automated Storage Provisioning
 - Cross-Brand Integration (i,p,x,z, and OEM)

- Contacts
 - Montpellier – Olivier Alluis / olivier.alluis@fr.ibm.com
 - Gaithersburg – John Amann / jdamann@us.ibm.com
 - Mainz – Michael Eggloff / eggloff@de.ibm.com
 - Makuhari – Kihoko Nanamori / kihoko@jp.ibm.com

GDPS-The Ultimate Availability Solution

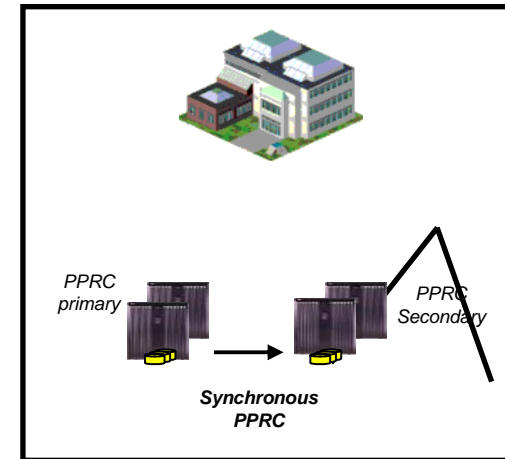

Metropolitan High Availability

Managing availability and disaster recovery

IBM GDPS® is designed to keep your critical IBM System z applications and open systems data available when outages occur and drastically reduce the time it takes to restore operations— averaging less than an hour for most clients with GDPS versus one to two days without. It can be designed to either eliminate or reduce downtime, depending on your needs.

Extend Parallel Sysplex Continuous Access to Data

Unlimited Distance Disaster Recovery

GDPS is a proven suite of solutions in hundreds of businesses worldwide.

GDPS address the key factors that impact your business resilience and regulatory compliance: availability, time to restart systems after a disaster, data protection and distance between your primary and backup systems.

IBM works with your team — through assessment, planning and design, installation, testing, education and ongoing support — to deliver the customized multi- or single-site GDPS solution that's right for you.

Portfolio Review and Analysis

"PRA" - a study for IBM zSeries customers

- **helps understand the potential impact of processing growth on future software budgets by developing predictive costs models.**
- **provides you with a comparison of your current portfolio cost structure with those of other zSeries/S390 customers.**
- **analyzes your software portfolio to identify redundant or underutilized software products.**
- **identifies product alternatives and their cost/ benefit impact.**
- **provides you with negotiation leverage with incumbent product vendors.**
- **provides you with the latest Software Asset Management tips to help proactively manage your zSeries/S390 software portfolio**

<http://www-3.ibm.com/software/solutions/softwaremigration/sps.html>

Or contact Linda Beckner at (614) 659-7192 or at Becknel@us.ibm.com.

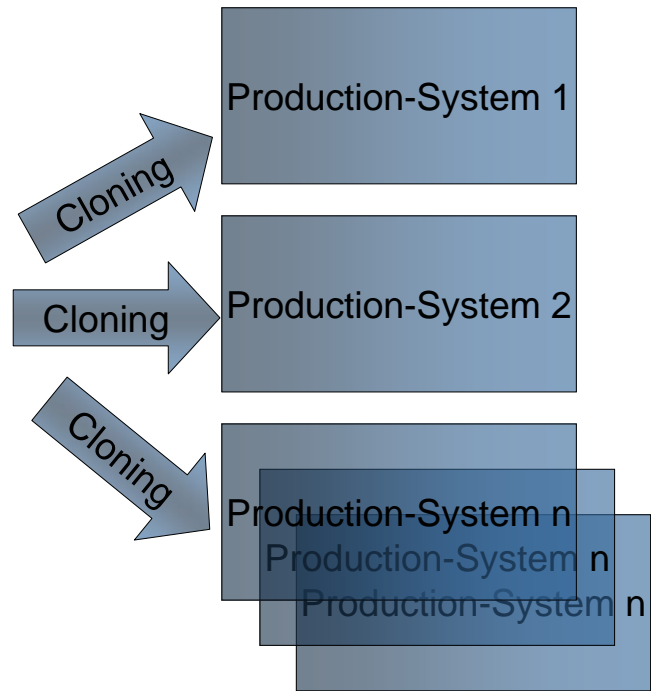

Customized Platform Service (CPS) for optimized Release Management, by use of the existing – Client owned – System Architecture/Design.

For further information please contact by mail gert_albrecht@de.ibm.com or phone

Scalability

- Gathering of all Client individual data
 - CSI, naming conventions, catalog struct., etc.
- Product Planning
 - SW compatibility and pre-req checking for all SW products (IBM and ISV)
 - Product portfolio recommendation
- Centralized installation, configuration and documentation of Version/Release of all selected SW products
 - z/OS, incl. corresponding features and all other related IBM products (middleware, tools, etc.)
 - More than 500 ISV products
 - Adaptation of USERMODs and EXITs
 - Functional testing and delivery of the platform
- Client can choose between different delivery options
 - SMS managed pool
 - with Starter System (back-level migrations)
 - Client specific system
- Support during platform activation
 -

CPS fixed price offering based on

- Number of products & EXITs
- Only migration & naming conventions
- Migration, naming conventions & full customization

Service extensions based on

- time & material

For Tool Migrations contact:

Advancing toward goal of 20,000 additional mainframe educated students in marketplace by 2010

Significant momentum with Academic Initiative to build mainframe systems and enterprise skills

- ▶ **>23,000 students worldwide educated to date**
- ▶ **School enrollments grew 900% in 2 years, Over half outside of US**
1/04 = 24; YE04 = 70; YE05 = 213;
Today 294
- ▶ **14 courses available to all schools**
- ▶ **2005, 2006 Student Mainframe Contests – 2,523 students from 302 schools**
- ▶ **6 University HUB systems actively sharing academic mainframe resources worldwide**
- ▶ **zNextGen community kicked off with SHARE/IBM**
- ▶ **Over 200 IBM mainframe ambassadors assisting schools**

And more planned ...

- ▶ **Student Mainframe Contest in Europe, NA & Brazil**
- ▶ **3 more courses (17 total)**
- ▶ **T3 – Faculty Education Seminars ongoing**
- ▶ **More specializations (Majors, Certifications)**
- ▶ **Matching schools with customers**
- ▶ **Faculty Awards**

System z for ISVs

Comprehensive resources helping System z ISVs build middleware-based applications, develop skills and close business

■ Consulting

- ▶ In depth technical consultation with System z developer
- ▶ Assessment of resources required

■ Training and education

- ▶ Providing skills for developers and business partners
- ▶ No charge z/OS class via IIC at Dallas
- ▶ Special educational discounts

■ Access to development environment

- ▶ No charge remote access to latest System z hardware technology
- ▶ No charge technical support packages
- ▶ Worldwide centers for in-person technical support

■ Hardware and software discounts

- ▶ Substantial discounts for application development on z/OS

■ Marketing Benefits

- ▶ Discounted advertising
- ▶ Sales Connections
- ▶ Web Content Syndication Tool (WebCollage)
- ▶ Joint telemarketing
- ▶ Application sales kits to education IBM sales teams

■ Sales Support

- ▶ Investing in driving leads and closing business for **System z ISVs**
- ▶ Assigned IBM sales reps to close business

■ Participation requirements

- ▶ Port a new application to z/OS which runs on WAS or DB2 or enable an existing one with WAS V6
- ▶ GA the application within 3 months of porting
- ▶ Create GSD entry and a sales kit for the application

To get started, submit the System z porting questionnaire at
http://www-03.ibm.com/servers/eserver/zseries/zos/was_portquestion/index.html

Where To Find More Information

The Internet – www.ibm.com/software/systemz

The screenshot shows the IBM System z website interface. At the top, there's a navigation bar with 'Home', 'Products', 'Services & industry solutions', 'Support & downloads', and 'My IBM'. Below this is a search bar and a 'Software' dropdown menu. The main content area is titled 'IBM software for System z' and includes sections for 'System z' (with sub-sections for Library, Downloads, Events, and News), 'Special offers' (featuring ShopzSeries and CCR2 e-newsletter), 'Why software for System z' (discussing the power of System z in driving an enterprise), and 'What we offer' (covering Information Management, IT Service Management, and SOA and Enterprise Transformation).

The Mainstream – www.ibm.com/software/zseries/mainstream

The screenshot shows the IBM Mainstream website interface. At the top, there's a navigation bar with 'Home', 'Products', 'Services & industry solutions', 'Support & downloads', and 'My account'. Below this is a search bar and a 'Country/region' dropdown menu. The main content area is titled 'The Mainstream Business journal for the System z community' and includes sections for 'In this issue:' (featuring Feature articles, Mainframes in the news, Case Studies, Special announcement, Downloads center, Enterprise tools for the practitioner, Events, workshops and resources, and Subscribe), 'Feature articles' (discussing the new TCO and the value of the mainframe), and 'Related links' (including XML Toolkit for zSeries, Software Asset Management, Mainframe servers, Software Migration Project Office, and Warranties, licenses and maintenance).

Webcasts/Telecons

- Feb 08:** The evolution of Tivoli on System z
- Feb 15:** OMEGAMON XE V4.1 new features and migration considerations
- Feb 21:** Unleash the power of your existing mainframe assets into the SOA world
- Feb 28:** Best Practices for System z security
- Feb 28:** Webify your mainframe applications with WebSphere Host Access Transformation Services V7.0
- May 7:** Connectivity Solutions for CICS and IMS
- May 17:** Best Practices for IMS: Historical Performance Analysis

Events/Seminars/Briefings

- Feb–Dec:** System z Breakfast/Brunch Briefings. Various cities, Germany
- Mar 6:** The Modern Mainframe – At the Heart of your Business [agenda]. Saudi Arabia
