About this document

The release notes include late technical information that is not included in other topics and highlights new functions for the AIX 5.2 Workload Partitions for AIX 7 licensed program.

Highlighting

The following highlighting conventions are used in this document:

Bold	Identifies commands, subroutines, keywords, files, structures, directories, and other items whose names are predefined by the system. Also identifies graphical objects such as buttons, labels, and icons that the user selects.
<i>Italics</i>	Identifies parameters whose actual names or values are to be supplied by the user.
Monospace	Identifies examples of specific data values, examples of text similar to what you might see displayed, examples of portions of program code similar to what you might write as a programmer, messages from the system, or information you should actually type.

Case-sensitivity in AIX

Everything in the AIX[®] operating system is case-sensitive, which means that it distinguishes between uppercase and lowercase letters. For example, you can use the **ls** command to list files. If you type **LS**, the system responds that the command is not found. Likewise, **FILEA**, **FiLea**, and **filea** are three distinct file names, even if they reside in the same directory. To avoid causing undesirable actions to be performed, always ensure that you use the correct case.

ISO 9000

ISO 9000 registered quality systems were used in the development and manufacturing of this product.

What's New

AIX 5.2 Workload Partitions for AIX 7 Version 1.1.2.0 uses simplified packaging that includes only the **vwpar.52.rte** fileset. The **bos.wpars** and **wio.common** filesets are not required to create a 5.2 WPAR. When the **vwpar.images.52** image is installed from the media, only the **vwpar.52.rte** fileset is copied to the `/usr/sys/inst.images` directory, which is the default directory.

Read this before installation

AIX 5.2 Workload Partitions for AIX 7 Version 1.1.2.0 is a licensed program that is sold separately from the AIX operating system.

For more information about AIX 5.2 Workload Partitions (WPAR) for AIX 7, see the Versioned workload partitions topic.

System requirements

You must install this version of the licensed program on IBM® AIX 7 with Technology Level 2, or later.

For more information about system requirements, see the Requirements for versioned WPARs topic.

Installation, migration, upgrade, and configuration information

The following error message is displayed when you use the **cfgmgr** command inside a 5.2 WPAR:

```
cfgmgr: 0514-0607 There are no sequence rules to execute for the specified phase.
```

To fix this error message, you must install AIX 5.2 Workload Partitions for AIX 7 Version 1.1.2.0 on IBM AIX 7 with Technology Level 2, or later, before you create a 5.2 workload partition.

If you do not have AIX 5.2 Workload Partitions for AIX 7 Version 1.1.2.0 installed, go to the Entitled Software Support website to download or order the physical media for the 5692-A6P SPO with feature 2269 - AIX V5.2 Workload Partitions for AIX V7.

For more information about installing AIX 5.2 Workload Partitions for AIX 7, see the Installing support for versioned WPAR topic.

Limitations and restrictions

The resource set (`rset_t`) structure contains information about allocated processors and memory pools. A `rset_t` structure might be allocated and initialized by calling the `rs_alloc` subroutine. It is possible that the processor allocation data that is provided by the AIX kernel to a 5.2 WPAR might be inaccurate. This data is inaccurate because AIX 5.2 and AIX 5.3 has a maximum of 256 processors and the structure is sized appropriately. In AIX 6.1, or later, the number of processors increased and the size of the `rset_t` structure increased. The correct `rset_t` structure size is returned to a 5.2 WPAR. However, because the `rset_t` structure size is smaller, not all processors can be included in the returned data. Processors that are numbered above 255 and allocated to the WPAR are not included in the resource set.

For more information about restrictions and limitations, see the Restrictions and limitations within a versioned WPAR topic.

Notices

This information was developed for products and services offered in the US.

IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not grant you any license to these patents. You can send license inquiries, in writing, to:

*IBM Director of Licensing
IBM Corporation
North Castle Drive, MD-NC119
Armonk, NY 10504-1785
US*

For license inquiries regarding double-byte character set (DBCS) information, contact the IBM Intellectual Property Department in your country or send inquiries, in writing, to:

*Intellectual Property Licensing
Legal and Intellectual Property Law
IBM Japan Ltd.
19-21, Nihonbashi-Hakozakicho, Chuo-ku
Tokyo 103-8510, Japan*

Some jurisdictions do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. IBM may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

Any references in this information to non-IBM websites are provided for convenience only and do not in any manner serve as an endorsement of those websites. The materials at those websites are not part of the materials for this IBM product and use of those websites is at your own risk.

IBM may use or distribute any of the information you provide in any way it believes appropriate without incurring any obligation to you.

Licensees of this program who wish to have information about it for the purpose of enabling: (i) the exchange of information between independently created programs and other programs (including this one) and (ii) the mutual use of the information which has been exchanged, should contact:

*IBM Director of Licensing
IBM Corporation
North Castle Drive, MD-NC119
Armonk, NY 10504-1785
US*

Such information may be available, subject to appropriate terms and conditions, including in some cases, payment of a fee.

The licensed program described in this document and all licensed material available for it are provided by IBM under terms of the IBM Customer Agreement, IBM International Program License Agreement or any equivalent agreement between us.

The performance data and client examples cited are presented for illustrative purposes only. Actual performance results may vary depending on specific configurations and operating conditions.

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not tested those products and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Statements regarding IBM's future direction or intent are subject to change or withdrawal without notice, and represent goals and objectives only.

All IBM prices shown are IBM's suggested retail prices, are current and are subject to change without notice. Dealer prices may vary.

This information is for planning purposes only. The information herein is subject to change before the products described become available.

This information contains examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to actual people or business enterprises is entirely coincidental.

COPYRIGHT LICENSE:

This information contains sample application programs in source language, which illustrate programming techniques on various operating platforms. You may copy, modify, and distribute these sample programs in any form without payment to IBM, for the purposes of developing, using, marketing or distributing application programs conforming to the application programming interface for the operating platform for which the sample programs are written. These examples have not been thoroughly tested under all conditions. IBM, therefore, cannot guarantee or imply reliability, serviceability, or function of these programs. The sample programs are provided "AS IS", without warranty of any kind. IBM shall not be liable for any damages arising out of your use of the sample programs.

Each copy or any portion of these sample programs or any derivative work must include a copyright notice as follows:
