IBM.

SYSTEM STORAGE DR550 INTEROPERABILITY DIRECTORY

Brief Company Overview

IBM® FileNet® Content Manager is the core content management solution for the FileNet P8 platform.
It combines powerful document management with ready-to-use workflow and process capabilities to automate and drive your content-related tasks and activities.

*   Provides the content management, security management, and storage management engine for FileNet P8. V4.5 provides new functions for Agile ECM.
*   Combines universal content management and advanced document management capabilities with industry-leading Active Content process capabilities to drive unstructured information for better and faster use in your organization
*   Delivers active management of enterprise content across the enterprise regardless of what repository it resides in
*   Maintains secure control over metadata, process and compliance activities while managing highly customized, transactional content delivered to the right place at the right time
*   Streamlines document management tasks by providing extensive versioning and parent-child capabilities, approval workflows and integrated publishing support
*   Provides you with the tools to deploy turnkey solutions that handle complex document types using out-of-the-box workflow and process capabilities

Platform support for DR550:

AIX: X	OS/390:	OS/400:	Linux/pSeries:	Linux/iSeries:
Linux/zSeries:	Linux/Red Hat: X	Novell NetWare:	Sun Solaris: X	HP-UX: X
Windows XP:	Windows NT:	Win 2000:	Win 2003: X	Win 2008: X
Novell SUSE on system Z: X	Red Hat on system Z: X			

For latest information please refer to the "IBM FileNet P8 Hardware and Software requirement guide.

Paragraph description of Product(s) and (include benefits):

IBM® FileNet® P8 Platform is a next-generation, unified enterprise foundation for the integrated FileNet P8 products. It combines the enterprise content management reference architecture with comprehensive business process management and compliance capabilities. FileNet P8 addresses the most demanding compliance, content and process management needs for your entire organization. It is a key element in creating an agile, adaptable ECM environment necessary to support a dynamic organization that must respond quickly to change. Agile ECM solutions using IBM technologies bring together capabilities for process management, content management, regulatory compliance and legal discovery. These flexible, extensible solutions and the ability to leverage these capabilities in an integrated environment can help you align key functions to your challenges and opportunities.

It includes a comprehensive set of content and process management business services that can be consumed and deployed in a service-oriented architecture. It also includes multilingual system capabilities for decentralized, federated system architectures, Advanced Security Services, comprehensive auditing and a standards-based authentication framework.

The platform supports flexible API for Java™, Microsoft® .NET® and XML Web services application development for a rich and interactive user experience that can be easily customized. It also supports Enterprise System Management tools , enterprise scalability, and flexible system deployment in clustered and highly available environments.
