

## Earth Science Chapter 10: Pre-lab

*You must find **three** items that you would like to make fossil imprints of. You may choose items such as leaves, twigs, textured rocks, dead insects, shells, etc. Be aware that these items may be damaged or destroyed, so do **NOT** choose items that are expensive or have sentimental value. Bring those items in on Mon Dec 8, 2008. Answer the questions below. Answers that cannot be read will be counted as incorrect.*

1. What three items did you find?

2. Why did you choose these three items?

3. Figure out the era and the period when these organisms first showed up on Earth. Look in Section 5 and 6 for help.

A. modern humans

B. jawless fish

C. winged insects

D. first life on the planet; single-celled organism similar to modern-day bacteria

E. amphibians

F. birds

G. reptiles
